# CYMBIDIUM LIST 1950

#306 MINIVET, VAR. MAXINE

ORCHID RESEARCH CO.  
Altadena, California

# FOREWORD

The first cymbidium collected from the environs of India and Burma was giganteum in 1821, followed by other species in successive years. In 1889, the cymbidium hybrid was introduced, cym. eburneo-Lowianum. Since that time, through selective breeding, about 1500 hybrids have been developed, named and registered. These represent in many instances, many generations of the most sturdy, free flowering cymbidiums, selected for form and color to produce the steady improvement in the quality of the present hybrids.

We have in our large collection over 600 hybrid and specie cymbidiums to satisfy your color preferences, your plant purchase budget, and your landscaping plans for patio, garden, or greenhouse. Flowering size divisions in six to twelve inch pots are available for those who wish more substantial plants. Well established back bulb propagations in five inch pots make possible a "start" of a fine hybrid or just an addition to the plants already in your collection to extend the color range or blooming season.

By exercising discrimination in your choice of varieties for color and blooming habit and season you can obtain flowers from December to August and colors from white through pink to deep red, yellows, greens and browns. It is impossible in this list to describe each variety offered but, upon request, information will be given or suggestions made.

*All pictures in this catalog are shown at approximately life size and are from unretouched color photographs*

CYMBIDIUMS  
PHALAENOPSES  
CATTLEYAS

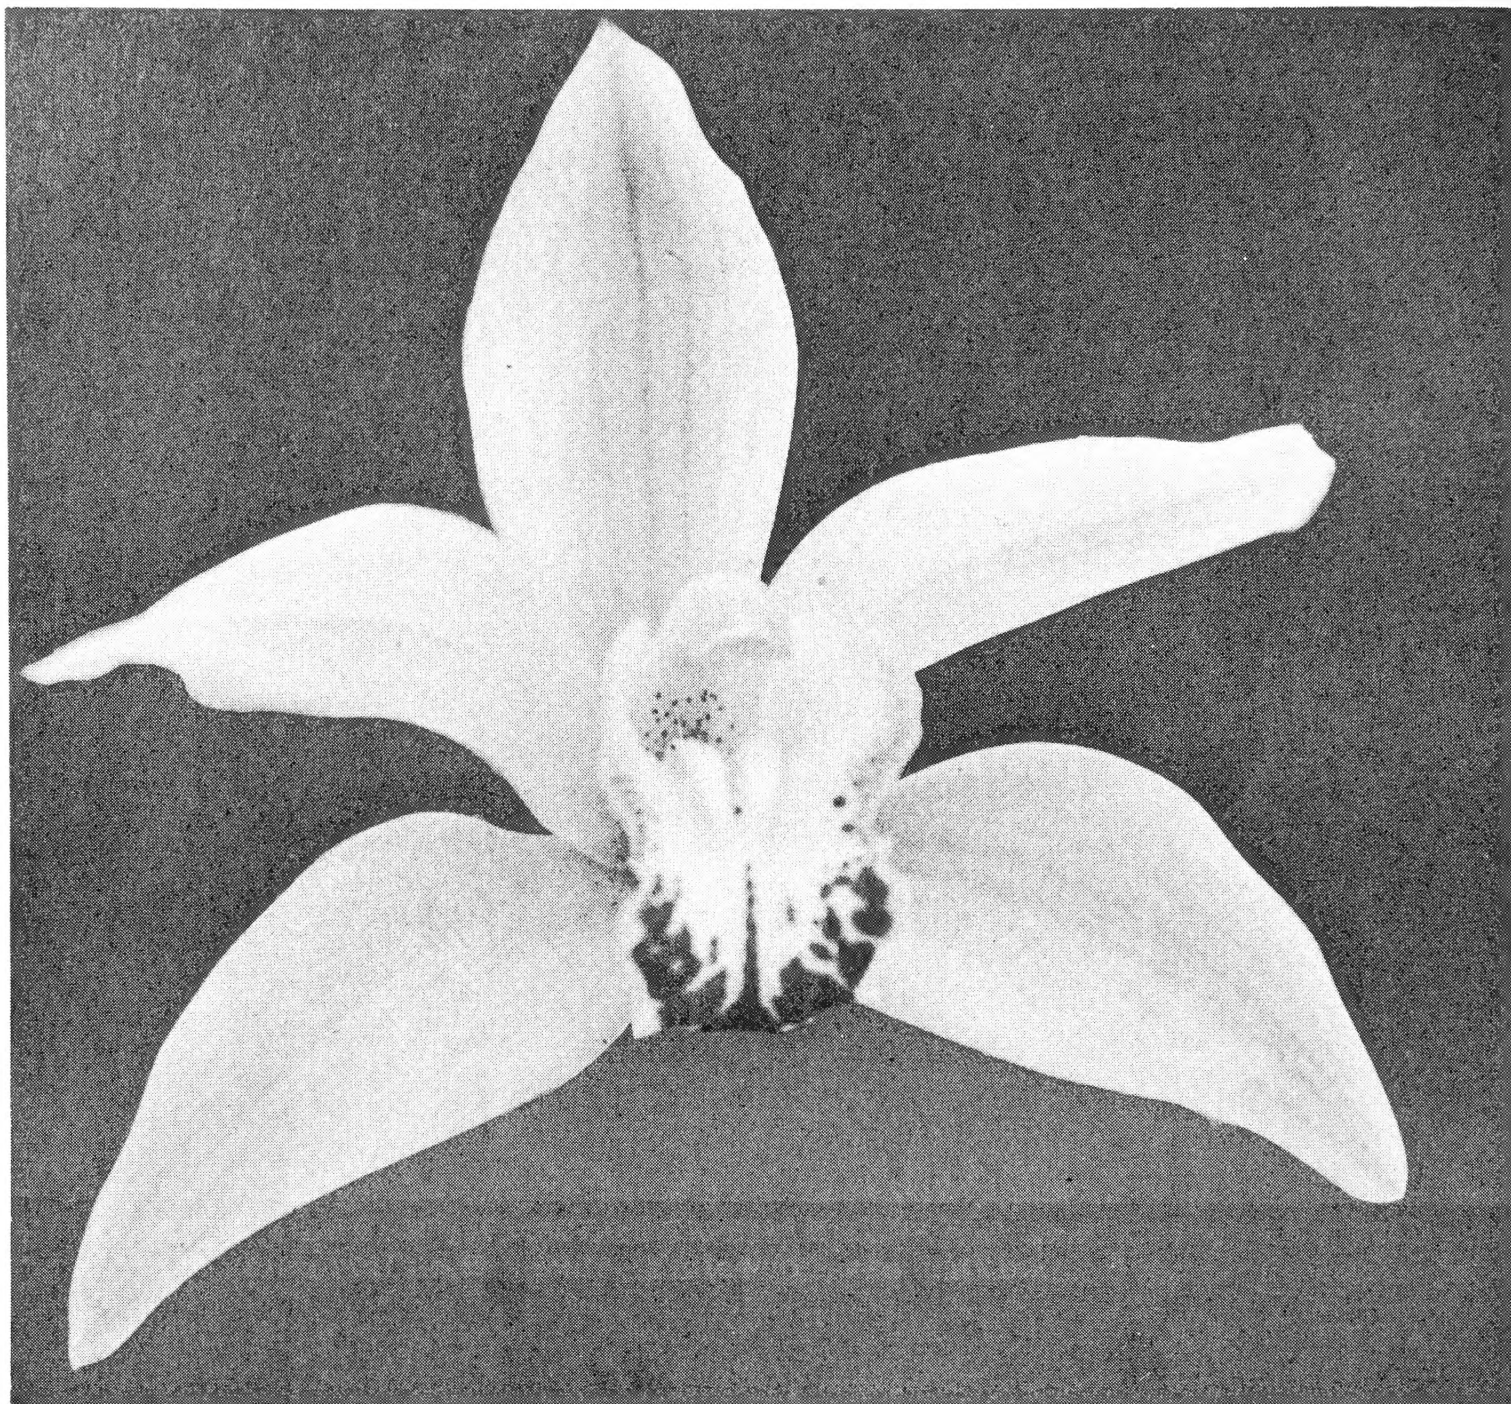

flasks  
community pots  
unflowered seedlings

# PLANT PREMIUM POLICY

All prices shown are net cash.

However, a plant premium value may be accumulated through purchases over an extended period. When a customer has purchased at least \$100.00 worth of plants, at one time or over an extended period, he may exchange his Plant Premium Policy for \$10.00 credit toward the purchase of any other plants selected by himself.

If a customer wishes to retain his Policy and accumulate purchases to a higher value, he will accumulate a higher proportional plant premium credit as indicated on the facsimile Plant Premium Policy card shown below.

When the Plant Premium Policy is exchanged for additional plants the customer will be issued a new Plant Premium Policy which will begin again at \$0.00.

The Plant Premium Policy will be a numbered card on which the record of all transactions will be kept; also the schedule of premiums.
